

FELIPE G PAVANELLI

+1 (603) 349-0273 | felipe.garcia.pavanelli@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)
AR/VR Developer, Game Designer, Technical Artist, and [Videographer](#)

EDUCATION

Dartmouth College, Hanover, NH

2026

Bachelor of Arts; Major in Computer Science; Minor in Digital Arts

GPA 3.78/4.0

Honors/Awards: Rufus Choates Scholar | Rick Angulo World Experience | Citations for Academic Excellence in *AR/VR Development*, *3D Design and Modeling*, and *Full Stack Web Development*

Relevant Coursework: Full Stack Development, Data Structures, Software Design & Implementation, Computer Networks, Algorithms, Discrete Math, AR/VR Design & Development, 3D Modeling & Animation, Digital Fabrication

Intensive Japanese Language Exchange Program, Osaka, Japan

SEPT 2023

Completed immersive coursework in advanced Japanese language, culture, and communication through daily instruction, homestays, and cultural exchange across Kyoto, Osaka, Nara, Hiroshima, and Tokyo.

SKILLS

Languages: Java, Python, C#, C, Bash, Git

Game Dev: Unity, Godot, Unreal Engine

Web/Mobile: HTML/CSS, Javascript, React.js, React Native, Flutter, Firebase, AWS, Vite, Zustand

Tools: Maya, Blender, NomadScul, Figma, Photoshop, Premiere Pro, Substance Painter

EXPERIENCE

Digital Applied Learning and Innovation (DALI) Lab, Digital Arts Domain lead

Jan 2026 - Present

- Lead the Digital Arts domain by overseeing animation, graphics, and 3D modeling initiatives, expanding DALI's creative reach through outreach, hiring, workshops, and open-lab hours.
- Manage termly hiring cycles for the Digital Arts team, handling applicant inquiries, addressing hiring challenges, and coordinating outreach efforts to attract top talent.
- Partner with UI/UX Lead, Project Relations, and faculty supervisors to screen and select new Digital Arts projects, develop mentor-driven workshops and mini-series, and continuously improve design practices, tools, and team culture.

Jones Media Center Baker Library, Creative and Technical Services Assistant

Jun 2025 - Present

- Produced a wide range of high-quality graphics, video edits, and animations as promotional material for Jones Media Center's equipment rentals and thematic community engagement efforts.
- Provided hands-on assistance with creative software and advanced videography/photography equipment, while maintaining, cleaning, charging, and resetting gear to ensure reliable, high-quality production for any Dartmouth Libraries member.

Digital Applied Learning and Innovation (DALI) Lab, *Software Engineer*

Mar 2024 - April 2025

8bit Orbit: Game Developer | *git, GD script, Godot* | [\[Deployer Link\]](#)

- Authored and maintained a detailed Game Design Document (GDD) to centralize design decisions, streamline partner alignment, and ensure project scalability for future developers and partner expansion.
- Designed core gameplay systems to simulate maintaining a satellite in low-earth orbit, including fuel management, trajectory stabilization, and collision avoidance with other satellites and debris.
- Coordinated technical vision and feature roadmap to serve the needs of three external partners, including software sustainability, replayability, and adaptability for new learning modules.

PROJECTS

ChoreoGrapher | *React, React Native, Firebase RTDB & Firestore, AWS S3, Expo* | [\[Demo Video\]](#)

Mar 2025 - Present

- Developed a collaborative web and native app for planning and animating group formations to support dance, sports teams, theater, and marching bands with integrated audio/video playback synchronization.
- Led a team of 4 developers working on the application architecture, front-end/back-end environments, and interface design.
- Conducted extensive user testing and iterated on early releases to incorporate domain-specific feedback.

Hypoxia | *C#, Unity, Virtual Reality, Meta Quest 3* | [\[Demo Video\]](#)

Feb 2024 - Mar 2024

- Designed and implemented in-game diegetic interface interactions for a multiplayer VR card game, enabling joystick navigation, lever & button physical inputs, as well as betting and card selection functionality.
- Developed logic to successfully display card elements in a dynamic layered interface, fully integrated with the game networking module, which contains multiple concurrent player actions.
- Managed contributions from design and dev teams to ensure consistent integration of VFX, SFX, animated 3D models, and an extensive modular codebase

BeatBop | *C#, Unity, Virtual Reality & Augmented Reality, Meta Quest 3* | [\[code\]](#)

Jan 2024 - Feb 2024

- Developed an XR rhythm game integrating AR and VR environments, synchronized with MIDI-based beat mapping.
- Engineered a musical state machine to trigger dialogue, scene transitions, and animation changes on beat for a boss-fight narrative experience.
- Implemented a modular score system with combo tracking, data persistence across sessions, and ranked results based on user input accuracy.
